*Quantity may vary depending on the size of your unit.

You will need:

Impact Driver

☐	#2 SQZ Driver Bit
+	#2 Pozi Driver Bit
☐	#1 Square Driver Bit

## Assembly Instructions

Step 1
Position Base Units A and B in their final location.
Join them using Titus Hilo screws in the pre-drilled holes.
*Skip this step for 2400mm Tote Base Units.

Tip: Fix Front of Class Unit Bases to wall prior to step 2.
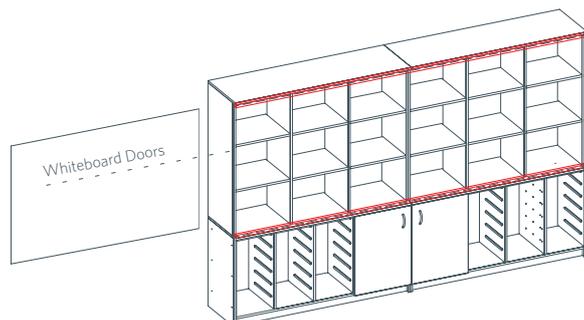

Step 2
Place Tops A and B onto the Unit Base, aligning the sides and back. Secure in place by screwing through the top of the Base using Surefix screws and the pre-drilled holes.

Tip: Fix Front of Class Unit Tops to wall prior to step 3.

Step 3
Using the pre-drilled holes (marked in red), screw the aluminium track into place with Hingefast screws. Slide the whiteboard doors onto the tracks, making sure the lockable door is at the front. Then, attach the "L Brackets" to each end of the bottom aluminium track using the same screws.

Whiteboard Doors

Step 4
With the whiteboard doors in place, attach both Unit Sides using 24 Titus Hilo screws in the pre-drilled holes. Finish by covering the screw heads with the provided cover caps.
